various exercises finally as a means of stressing the applicability of what has been learned in the laboratory exercise the student will be requested to generate an evaluation of some aspect of the anatomy such as using a method for determining age at death from assigned specimens the student is then required to interpret this information and produce for the next class or session a laboratory research report guidelines for these reports are contained within this manual diagrams photographs have been provided for students to label these diagrams are meant to be a study guide instructors may wish to add anatomical features or de emphasize certain features accordingly
